

## **Calling all Contractors:**

### **HVAC Sales & Supply is having an R410A certification class, and you are invited:**

The industry is changing, and we all need to be prepared. All of the major manufacturers are rapidly moving toward R410A as their refrigerant of choice. Even though the law requiring the end of manufacture of R22 units isn't until 2010, many industry experts are predicting a major shift to R410A much sooner. At the very least, you and your technicians should be prepared to service units using the new refrigerant.

If you want to be certified by ICP for the installation and servicing of R410A; or you want to know more about this refrigerant; or, if you are already familiar with R410A and want a refresher for you, or your technicians, you should attend.

Attend this class where we will cover:

- Industry Issues
- How R410A differs from R22
- Application
- Installation Overview
- Service Overview
- Certification Test

**Where: HVAC Sales & Supply Co., Inc.  
3940 Senator Street  
Memphis, TN 38118**

**When: May 12, 2009 at 5:00 p.m. – 8:30 p.m.**
